Fiat Water

Rock Garden

Ledges

Riffles (Rif.)

Rips

Rapids (Rap.)

Falls

Portage

Lake water or river current where no rapids exist.

Rock strewn flat water.

Projecting stratum of rock partially confining stream flow.

Moderately swift, shallow water running over gravel or sand bottom. (Becoming fiat water at peak flows).

Swift flowing deep water running an irregular short course around rocks. (Becoming more navigable at peak flows).

Swift flowing water tumbling with some force among obstructions creating turbulence. (Becoming more turbulent at peak flows).

Free falling water or almost vertical plunge.

Canoe carried around obstruction or between two points.

GENERAL COMMENTS

1

3

4

5

6

Permission shall be obtained before entering upon any lands for the purpose of travel or camping.

Check with the Nova Scotia Department of Natural Resources for fire and fishing regulations.

Boundary lines are approximate.

Use courtesy when approaching anglers.

Obtain permission before parking vehicles on any lands and avoid blocking trails etc. (Refer to section 135 of the Motor Vehicle Act).

Access points are noted on map. All other points require owner permission.

Note 7

Note 8

Put in point when water level is high. Parking at Irving station on corner of Highway 224. No parking in the field.

Recommended take out point for class I and II canoeists.
